Professional summary

Marketing Analyst with 3+ years across digital marketing, SaaS client work and ecommerce. Combines campaign leadership, channel measurement and conversion analysis with SQL, Python and BI. Uses targeting, funnel and retention analysis, promotion-cost review and experiment evaluation to turn evidence into practical growth decisions.

Core capabilities

Acquisition and targeting: Channel and lead-quality analysis, campaign planning, Google/Meta Ads, SEO, predictive targeting and lift.

Growth and budget efficiency: Funnel and cohort retention, promotion cost, marketplace subsidies, CAC/CIR and measurement planning.

Analytics and leadership: GA4, Looker Studio, SQL, Excel, Python and Power BI; KPI design, resource planning and team guidance.

Professional experience

Golden Owl Solutions | Digital Marketing Analyst

Apr 2024 - Sep 2025

- Led campaign planning, KPI definition, resource allocation and team guidance across paid acquisition, SEO and conversion work.
- Used lead quality and geographic performance to guide Golden Owl campaign allocation; reported Work-with-us CPL fell from VND 1.6M to VND 736K.
- Built GA4 and Looker Studio reporting and delivered 70+ analyses across 15 client businesses to inform channel, content and funnel decisions.

Laptop SGN | E-commerce Analyst (Freelance)

Jul 2025 - Dec 2025

- Connected 100,000+ GA4, channel, product and transaction records to acquisition, merchandising and retention questions using BigQuery, SQL and Excel.
- Identified product-to-cart conversion of 21.5% as a funnel constraint and developed recommendations from channel, device and returning-customer behavior.

Canawan Global | Digital Marketing Executive

Sep 2022 - Apr 2024

- Led a three-person content team across ecommerce and affiliate work, setting content priorities, shared KPIs and reporting schedules.
- Combined Etsy/Amazon marketplace and dropshipping knowledge with product research and acquisition reporting across a 1,000+ SKU catalog.

Marketing project evidence

Five independent case studies, completed individually from question to recommendation. Fintech expertise is project-based; professional experience is in ecommerce and marketing.

Mobility and delivery growth

Acquisition and measurement | Approximately 2 weeks

- Connected partner subsidy economics, first-month retention and channel spend with activation and downstream value using confidential company data in Excel.
- Diagnosed re-entry and checkout barriers; proposed controlled channel changes with acquisition and efficiency guardrails. Outcomes are recommendations; figures remain confidential.

Bank campaign targeting

Campaign targeting | Approximately 2 weeks

- Ranked historical outreach records for a constrained campaign: the top 20% captured 51.8% of responders at 30.3% conversion and 2.59x offline lift.
- Defined a prospective pilot to test incremental response and contact economics; excluded information unavailable before outreach.

Rokt holdout experiment

Experimentation | Approximately 2 weeks

- Evaluated an ad holdout: treatment conversion was 2.23% versus 1.95%, or +13.9% relative uplift. User-cohort sensitivity estimated +5.5% ($p = 0.016$).
- Audited assignment overlap and set rollout conditions rather than treating the headline estimate as guaranteed campaign impact.

ZaloPay promotion review

Promotion efficiency | Approximately 1 month

- Linked 4.26% of scored users to 26.94% of credited promotion cost; compared investigation workload with cost coverage using SQL, Python and Power BI.
- Recommended shadow-mode review and investigator feedback. No confirmed fraud, recovered savings or automatic blocking claimed.

TheLook ecommerce

Growth and retention | Approximately 1 month

- Connected acquisition, funnel, cohort retention and RFM segmentation across 2.42M synthetic events in SQL, Python and Power BI.
- Diagnosed 58.0% cart abandonment and 37.3% repeat-customer rate; framed checkout and lifecycle tests. No marketing-cost data was available for ROAS.
